

City Ranger 2250 Hedge Trimmer

Long, tall and/or wide hedges can present a real challenge. The work is hard and slow, often involving awkward positions. But not when using an City Ranger 2250 hedge trimmer. It is designed for the job, and the perfect choice for thuja, yew and hard beech hedges.

Efficient from top to bottom

The hedge trimmer is stable, manoeuvrable and easy to adjust – it works equally well on the left or the right side of the utility machine. It trims vertically from ground level up to a height of 320 cm. And of course horizontal trimming is a breeze – even the widest hedge is child's play. The hedge trimmer also trims at angles up to 45 degrees, taking care of those hard-to-reach corners. It always leaves a hedge evenly and attractively trimmed and tackles most terrain without difficulty, thanks to excellent four-wheel balance.

Side or top trimming is set up hydraulically and driver visibility is good no matter where or what is being trimmed.

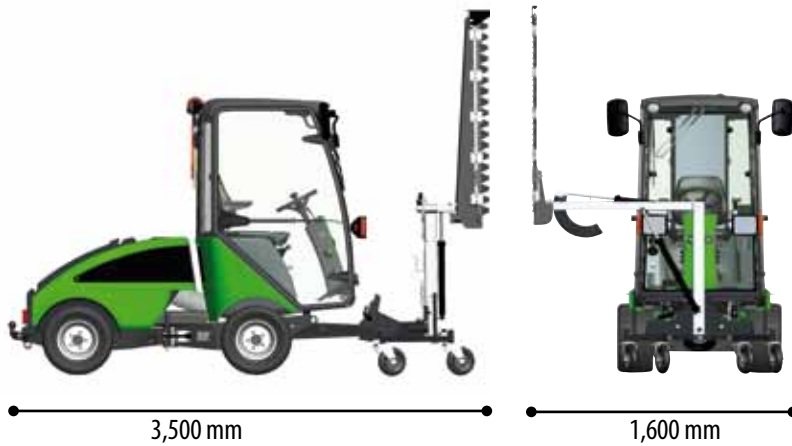

When you change attachments, the City Ranger 2250 hydraulic hoses are connected at the turn of a handle!

Technical data

Hedge Trimmer

Technical information

The hedge trimmer should be lubricated regularly during use. An oil sprayer is therefore fitted to the hedge trimmer, so oil is available as and when it is needed

The hedge trimmer is equipped with release springs. These protect the trimmer as it will "give" if it presses against hedge branches that are too thick

The hedge trimmer is equipped with a support strut, so it is easy to attach/detach

The hedge trimmer is supplied with a protective guard for transportation

Dimensions

Attached:

Length	3,500 mm
Width	1,600 mm
Height with roll bar	2,000 mm
Height with cab	1,960 mm

Storage dimensions:

Length	1,000 mm
Width	1,600 mm
Height	1,450 mm

Technical data:

Own weight	130 kg
Trimming width	1,300 mm
Trimming height	0 - 3,200 mm
Horizontal trimming height	300 - 2,100 mm
Horizontal reach	2,500 mm
Branch thickness max	20 mm
Operating speed	1-3 km/h
